

NCheck personal ID

Nowadays, organizations allow some level of personally owned technology to be used on business, a phenomenon known as BYOD (Bring Your Own Device). NCheck Personal ID uses an employee smart device to provide a dedicated time attendance recording terminal for the employee. NCheck Personal ID uses employee smart device to identify the user and face biometric to authenticate and authorize electronically recording the employee attendance. Time attendance recording with NCheck Personal ID is more secure than traditional methods of time attendance recording and more convenient for employees. There are number of additional benefits of using NCheck Personal ID. NCheck Personal ID can also be used in field workers and visiting employees. It is also do not have any health risk like in shared traditional terminals. Today there is a very high health risk in using shared terminals with physical touch in spreading diseases. So, your employee will more than 100% prefer NCheck Personal ID for attendance recording. It also a benefit for employers because they can get rid of managing and maintaining time attendance terminals and NCheck Personal ID is more secure and guaranteed to accuracy of attendance recording.

NCheck Personal ID comes with following benefits:

- Strong security with Employee face verification.
- Use of employee own device.
- It can restrict and control employee working location.
- Record include the location of attendance recording.
- No use of shared terminal, No health risk.
- Use employee smart device in built camera, No additional requirements.
- Employee can record attendance from anywhere, No queues.
- One click attendance marking – Quick and convenient.
- Monitoring employee attendance history – Mange work time.
